

Supplementary Materials

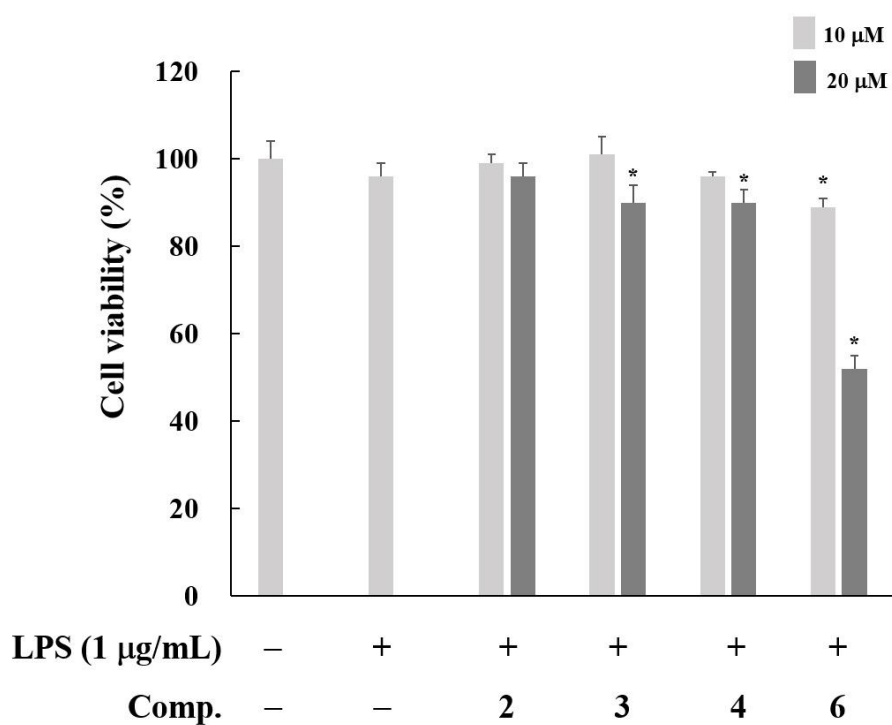

Figure S1. The effect of compounds **2-4** and **6** on cell viability of RAW 264.7 macrophages. Cells were treated with LPS (1 µg/mL) in presence or absence of test compounds (10 and 20 µM). Cell viability was determined by MTT assay. The values are expressed as the means ± S.D. of three experiments. * $p < 0.05$ (vs. vehicle control).
