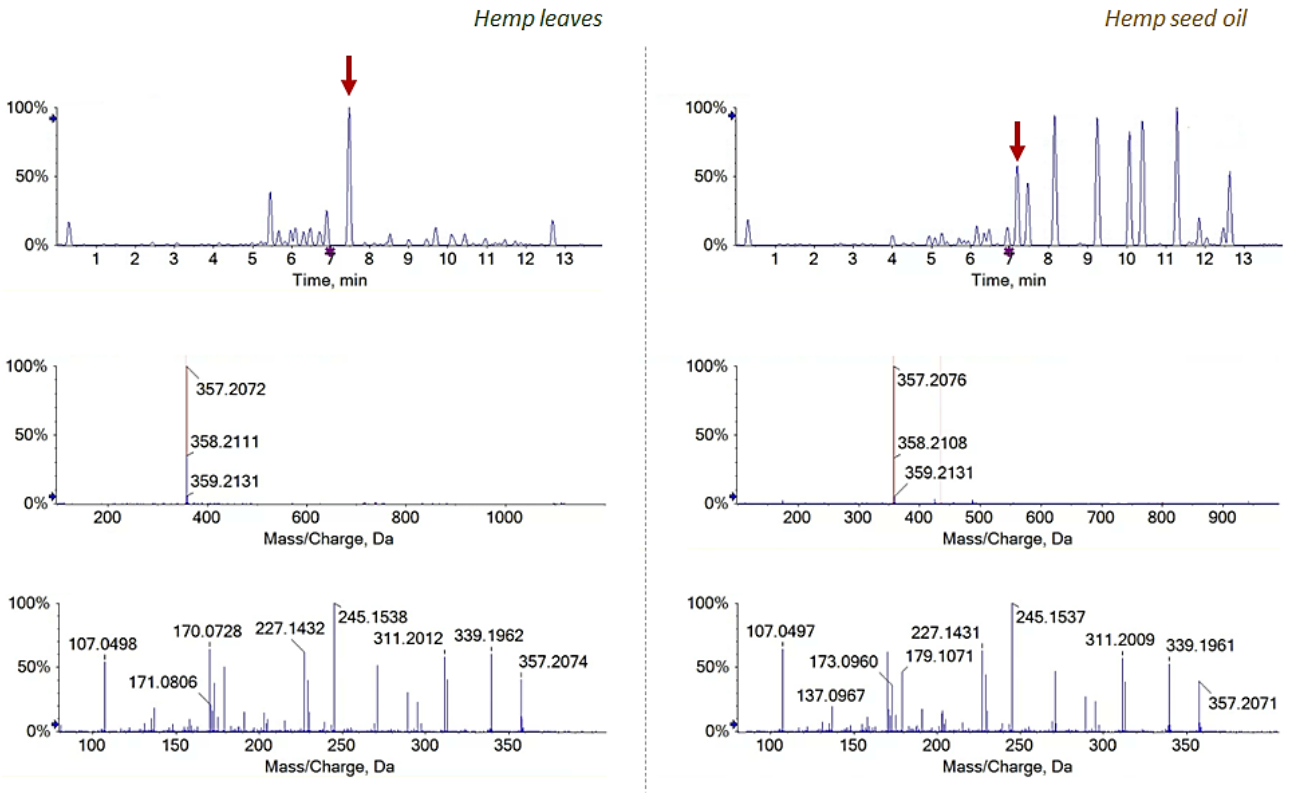

Figure S1. TOF-MS and MS/MS spectra of CBDA detected in leaf hemp sample and cold-pressed hemp seed oil. Red arrows highlight the corresponding peaks in the TICs (Total Ion Chromatograms).

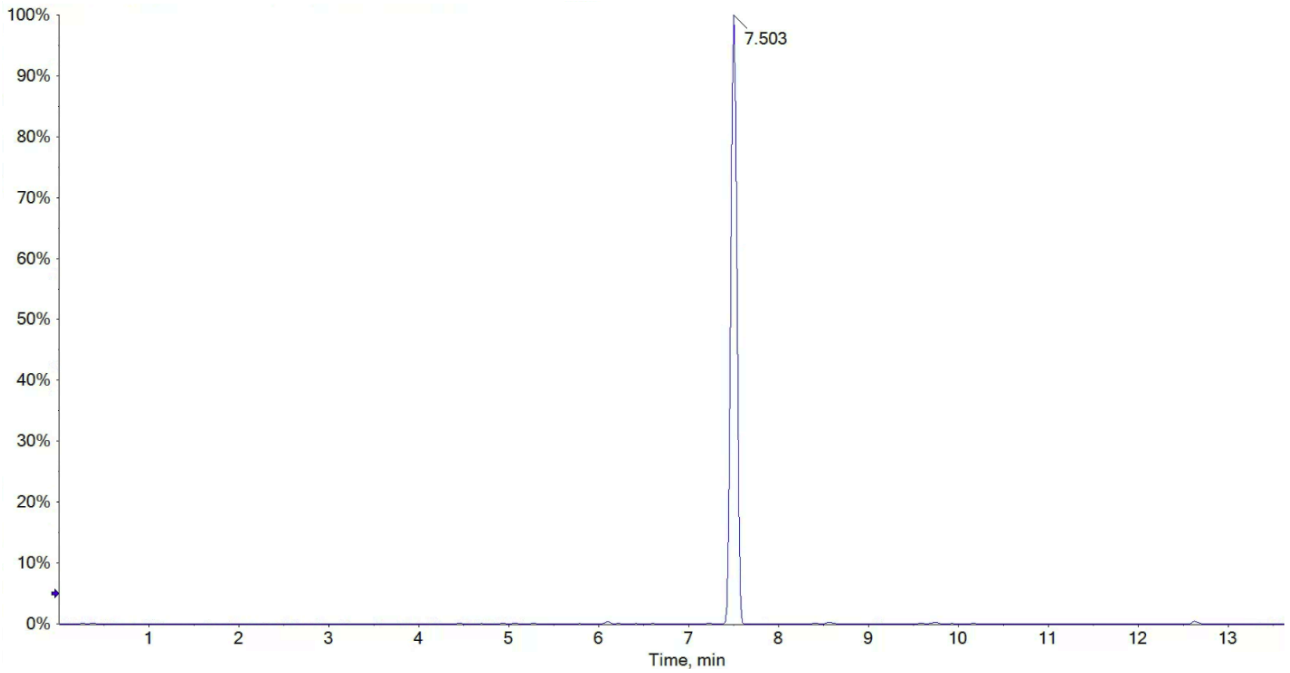

Figure S2. UHPLC-TOF-MS chromatogram of purified CBDA, acquired using the same experimental conditions of hemp leaf extract.

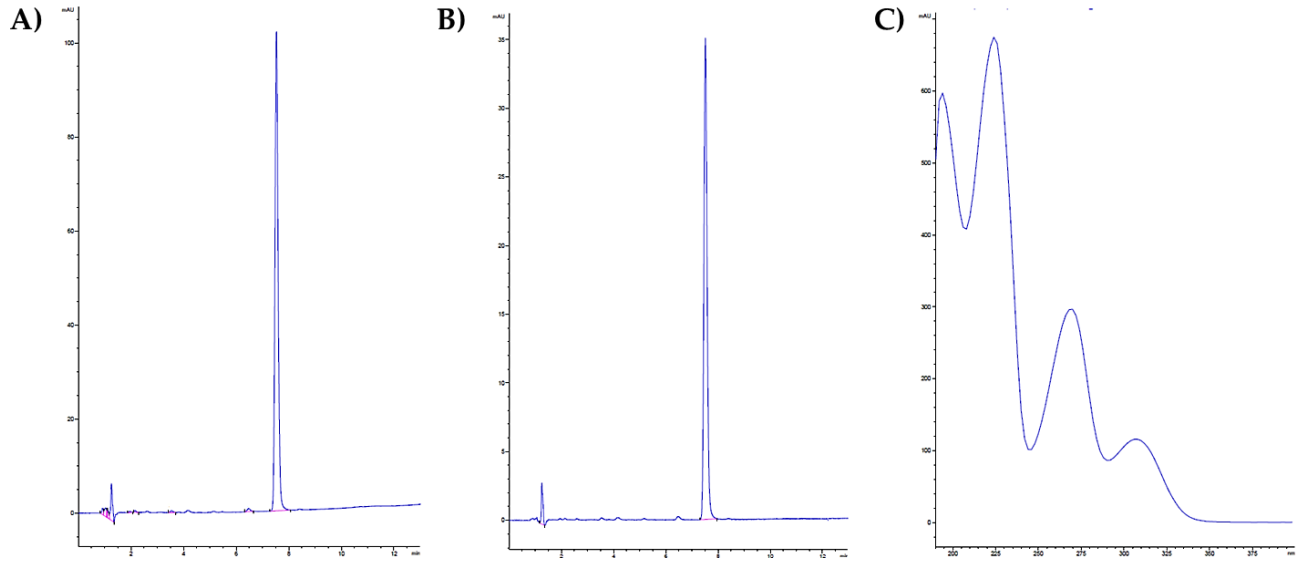

Figure S3. A) HPLC-UV chromatogram recorded at 266±4 nm; B) HPLC-UV chromatogram recorded at 306±4 nm; C) UV spectrum of purified CBDA.
