

Supplementary Materials: Where Land Use Changes Occur: Using Soil Features To Understand the Economic Trends in Agricultural Lands

Rosa Riviuccio, Lorenzo Sallustio, Massimo Paolanti, Matteo Vizzarri and Marco Marchetti

Table S1. Values of the parameters *N* and *A* per each territorial system analyzed (the whole Abruzzo region, the 3 SRs and the 4 LC classes).

	<i>N</i>	<i>A</i> (ha)
Abruzzo region	43,229	1,080,725
SR A	11,308	282,700
SR B	11,842	296,050
SR C	22,889	572,225
LC I-II	2036	51,147
LC III	19,473	489,169
LC IV	10,249	257,447
LC V-VIII	15,701	394,419

Table S2. MAVs for the different SRs and agricultural land uses (Mean and CV %).

	Abruzzo		SR A		SR B		SR C	
	Mean	CV	Mean	CV	Mean	CV	Mean	CV
AL	11,087	50.6%	14,991	27.0%	8666	38.8%	8575	73.8%
PC	22,746	27.2%	24,702	21.6%	19,066	24.6%	12,520	29.8%
GRA	7220	51.4%	2650	0.0%	3338	22.6%	8925	34.7%
Total	5730	140.1%	13,272	78.2%	3833	155.3%	3316	156.0%
