| Category                   | Measurements                           | Definitions  |
|----------------------------|--|--|
| Maxilla to Cranial Base    | SNA (°)                                | The angle formed by connecting sella, nasion, and A-point  |
|                            | SN-Palatal Plane (°)                   | The angle formed from the intersection of sella-nasion line and a line drawn connecting anterior nasal spine to posterior nasal spine                  |
|                            | SN-Occlusal Plane (°)                  | The angle formed from sella-nasion and occlusal plane  |
|                            | A-N Perpendicular (mm)                 | The linear distance from A point to the nasion perpendicular.  |
| Mandible to Cranial Base   | SNB (°)                                | The angle formed by connecting sella, nasion, and B-point  |
|                            | SNPog (°)                              | The angle formed by connecting sella, naision, and pogonion  |
|                            | FMA: MP-FH (°)                         | The angle formed from the intersection of porion-orbitale line and a line drawn connecting gonion to gnathion  |
|                            | SN-MP (°)                              | The angle formed from the intersection of sella-nasion line and a line drawn connecting gonion to gnathion   |
| Maxilla to Mandible        | Mandibular Plane to Occlusal Plane (°) | The angle formed by mandibular plane and occlusal plane  |
|                            | B-N Perpendicular (mm)                 | The linear distance from B point to nasion perpendicular   |
|                            | Pog-N Perpendicular (mm)               | The linear distance from pogonion to nasion perpendicular  |
|                            | Y-Axis: SGn-SN (°)                     | The angle formed by connecting nasion, sella, and gnathion   |
| Cranial Base               | ANB (°)                                | The difference between SNA and SNB   |
|                            | Palatal-Mandibular Angle (PP-MP) (°)   | The angle formed from palatal plane and mandibular plane   |
|                            | Wits Appraisal (mm)                    | The distance between A point to occlusal plane and B point to occlusal plane   |
|                            | Maxillary Length: ANS-PNS (mm)         | The linear measurement between anterior nasal spine and posterior nasal spine  |
| Upper Incisors to Maxilla  | Mandibular Length: Co-Gn (mm)          | The linear measurement between condylion and gnathion  |
|                            | Cranial Base Flexure Angle: Ba-S-N (°) | The angle formed by connecting basion, sella, and nasion   |
|                            | U1-SN (°)                              | The angle formed from a line connecting sella to nasion and a line connecting the upper incisor incisal tip to the root apex                           |
|                            | U1-NA (°)                              | The angle formed from a line connecting nasion to A-point and a line connecting the upper incisor incisal tip to the root apex                         |
| Lower Incisors to Mandible | U1-NA (mm)                             | The linear measurement from the labial surface of the upper incisor to the line connecting nasion to A-point   |
|                            | U1-Palatal Plane (°)                   | The angle formed by the position of maxillary incisor to palatal plane   |
|                            | U1 Protrusion (U1-APog) (mm)           | The distance from maxillary incisor to the A point-pogonion reference line   |
|                            | L1-MP (°)                              | The angle formed from a line connecting the lower incisor incisal tip to the root apex and a line connecting gonion to gnathion                        |
| Incisors to Each Other     | L1-NB (°)                              | The angle formed from a line connecting the lower incisor incisal tip to the root apex and a line connecting nasion to B-point                         |
|                            | L1-NB (mm)                             | The linear measurement from the labial surface of the lower incisor incisal to the line connecting nasion to B-point                                   |
|                            | L1 Protrusion (L1-APog) (mm)           | The distance from mandibular incisor to the A point-pogonion reference line  |
|                            | Interincisal Angle (°)                 | The angle formed from a line connecting the lower incisor incisal tip to the apex and a line connecting the upper incisor incisal tip to the root apex |
| Overjet (mm)               |  | The horizontal distance from maxillary incisor tip to mandibular incisor tip   |
| Overbite (mm)              |  | The vertical distance from maxillary incisor tip to mandibular incisor tip   |

|         |  |   |
|---------|--|---|
|         | Hard Tissue Upper Face Height: N-ANS (mm)  | The linear measurement between nasion and anterior nasal spine                                      |
|         | Hard Tissue Lower Face Height: ANS-Me (mm) | The linear measurement between anterior nasal spine and menton                                      |
|         | UFH (N-ANS/(N-ANS+ANS-Me)) (%)             | The ratio of the upper face height to facial height   |
|         | LFH (ANS-Me/(N-ANS+ANS-Me)) (%)            | The ratio of lower face height to facial height   |
|         | Posterior Face Height: Ar-Go (mm)          | The linear measurement between articulare and gonion  |
|         | PFH:AFH (Co-Go:N-Me) (%)                   | The ratio of posterior facial height to anterior facial height                                      |
| Profile | Convexity: NA-APog (°)                     | The angle formed by connecting nasion, A-point, and pogonion  |
|         | Facial Angle: FH-NPog (°)                  | The angle formed from a line connecting porion to orbitale and a line connecting nasion to pogonion |
