

Table S1. Comparison of per grain damage by *T. granarium* and *R. dominica*.

Variety	Weight (mg) of a grain damaged by <i>T. granarium</i>		Weight (mg) of a grain damaged by <i>R. dominica</i>	
	15 days	30 days	15 days	30 days
Akbar	32.143	41.25	-	15
Akbar	35.455	34.194	-	24
Akbar	29.375	-	-	-
Mean	32.324	37.722	-	19.5
Dilkash	32.5	36.667	24	22.222
Dilkash	31.176	26.875	30	20
Dilkash	31.111	28.462	21.667	-
Mean	31.596	31.596	25.222	21.111
Bakhar star	28.75	28.889	-	28.333
Bakhar star	26.875	29.167	26.667	20
Bakhar star	26.552	27.879	-	-
Mean	27.392	28.645	26.667	24.167

(-) symbol represents no grains were found damaged in a particular replication in the experimental setup; bold values are means of weights of individual damaged grains by two different species.
