

## Supplementary Materials

### List of publications used for the extractions of conditioning factors and predictors

1. Colaresi, M., & Mahmood, Z. (2017). Do the robot: Lessons from machine learning to improve conflict forecasting. *Journal of Peace Research*, 54(2), 193-214. <https://doi.org/10.1177/0022343316682065>
2. Arana-Catania, M., Van Lier, F. A., & Procter, R. (2022). Supporting peace negotiations in the Yemen war through machine learning. *Data & Policy*, 4, e28. <https://doi.org/10.1017/dap.2022.19>
3. Blair, R. A., & Sambanis, N. (2020). Forecasting Civil Wars: Theory and Structure in an Age of Big Data and Machine Learning. *Journal of Conflict Resolution*, 64(10), 1885-1915. <https://doi.org/10.1177/0022002720918923>
4. Kikuta, K. (2022). A new geography of civil war: a machine learning approach to measuring the zones of armed conflicts. *Political Science Research and Methods*, 10(1), 97-115. <https://doi.org/10.1017/psrm.2020.16>
5. D'Orazio, V., Honker, J., Prasad, R., & Shoemate, M. (2019). Modeling and Forecasting Armed Conflict: AutoML with Human-Guided Machine Learning. In 2019 IEEE International Conference on Big Data (Big Data) (pp. 4714-4723). IEEE. <https://doi.org/10.1109/BigData47090.2019.9005963>
6. Mueller, H., Groeger, A., Hersh, J., Matranga, A., & Serrat, J. (2021). Monitoring war destruction from space using machine learning. *Proceedings of the National Academy of Sciences of the United States of America*, 118(23), e2025400118. <https://doi.org/10.1073/pnas.2025400118>
7. Beger, A., Morgan, R. K., & Ward, M. D. (2021). Reassessing the Role of Theory and Machine Learning in Forecasting Civil Conflict. *Journal of Conflict Resolution*, 65(7-8), 1405-1426. <https://doi.org/10.1177/0022002720982358>
8. Bagozzi, B. E., & Koren, O. (2017). Using Machine Learning Methods to Identify Atrocity Perpetrators. In 2017 IEEE International Conference on Big Data (Big Data) (pp. 3042-3051). IEEE. <https://doi.org/10.1109/BigData.2017.8258276>
9. Henrickson, P. (2020). Predicting the costs of war. *Journal of Defense Modeling and Simulation: Applications, Methodology, Technology (JDMS)*, 17(3), 285-308. <https://doi.org/10.1177/1548512919826375>
10. Musumba, M., Fatema, N., & Kibriya, S. (2021). Prevention Is Better Than Cure: Machine Learning Approach to Conflict Prediction in Sub-Saharan Africa. *Sustainability*, 13(13), 7366. <https://doi.org/10.3390/su13137366>
11. Fawaz, M., & Le Quellec, E. (n.d.). Indirect Rivalries and Civil Wars: Empirical Evidence. *Defence and Peace Economics*. <https://doi.org/10.1080/10242694.2022.2129350>
12. Ge, Q. S., Hao, M. M., Ding, F. Y., Jiang, D., Scheffran, J., Helman, D., & Ide, T. (2022). Modelling armed conflict risk under climate change with machine learning and time-series data. *Nature Communications*, 13(1), 2839. <https://doi.org/10.1038/s41467-022-30356-x>
13. Goldfarb, A., & Lindsay, J. R. (2021). Prediction and Judgment: Why Artificial Intelligence Increases the Importance of Humans in War. *International Security*, 46(3), 7-50. [https://doi.org/10.1162/isec\\_a\\_00425](https://doi.org/10.1162/isec_a_00425)
14. Nardulli, P. F., Althaus, S. L., & Hayes, M. (2015). A PROGRESSIVE SUPERVISED-LEARNING APPROACH TO GENERATING RICH CIVIL STRIFE DATA. *Sociological Methodology*, 45, 148-183. <https://doi.org/10.1177/0081175015581378>
15. Hirose, K., Imai, K., & Lyall, J. (2017). Can civilian attitudes predict insurgent violence? Ideology and insurgent tactical choice in civil war. *Journal of Peace Research*, 54(1), 47-63. <https://doi.org/10.1177/0022343316675909>
16. Blair, R. A., & Sambanis, N. (2021). Is Theory Useful for Conflict Prediction? A Response to Beger, Morgan, and Ward. *Journal of Conflict Resolution*, 65(7-8), 1427-1453. <https://doi.org/10.1177/00220027211026748>
17. Ball, P., & Price, M. (2019). Using Statistics to Assess Lethal Violence in Civil and Inter-State War. *Annual Review of Statistics and Its Application*, 6, 63-84. <https://doi.org/10.1146/annurev-statistics-030718-105222>
