Yen, Hanoi, Vietnam

Deadline for manuscript  
submissions:

**closed (30 September 2020)**

### Message from the Guest Editors

Nonlinear differential equations, dynamical systems, and related topics are particularly trendy topics at present, as they have had wide and significant applications in many fields of Physics, Chemistry, Engineering, Biology or even Economics, in general, and Mathematics, in particular.

In addition, they can be approached using several different methods and techniques. As examples, we can refer to variational and topological methods, fixed point theory, initial and boundary value problems, continuous and discrete dynamical systems, qualitative theory, stability theory, the existence and control of chaos, and the existence of attractors and periodic orbits, among others.

In this Special Issue we propose to collect some state-of-the-art results that can contribute effectively to these areas.

Before submission authors should carefully read over the journal's instructions for Authors, in <http://www.mdpi.com/journal/axioms/instructions>

an Open Access Journal by MDPI

## Editor-in-Chief

### **Prof. Dr. Humberto Bustince**

Department of Statistics,  
Computer Science and  
Mathematics, Public University of  
Navarra, 31006 Pamplona, Spain

## Message from the Editor-in-Chief

*Axioms* is dedicated to the foundations (structure and axiomatic basis, in particular) of mathematical theories, not only from a crisp or strictly classical sense, but also from a fuzzy and generalized sense. This includes the more innovative current scientific trends, devoted to discover and solve new challenging problems. The prime goal of *Axioms* is to publish first-class, original research articles under an open access policy with minimal fees for the authors. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High visibility:** indexed within **SCIE (Web of Science)**, **dblp**, and **other databases**.

**Journal Rank:** JCR - Q1 (Mathematics, Applied)

**Rapid Publication:** manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the first half of 2024).
