### Message from the Guest Editor

Dear Colleagues,

We invite research and review papers in any area of the NF- $\kappa$ B field that are related, but not limited to, fundamental understanding of NF- $\kappa$ B signaling pathways, gene expression profiling, epigenetic regulation, diagnostic, prognostic and pharmacogenomic biomarkers, molecular targets driving the progression of human cancers, cancer drug development on these targets, clinical trial with new agents, and validation in animal models.

We hope that this Special Issue reflects the exciting era that we are living in with respect to the field of NF- $\kappa$ B and its applications in cancer research.
