Message from the Guest Editor

This Special Issue welcomes papers related to the main topic, including but not limited to the etiology of infection to understand diagnosis, genomics, genome-phenome approaches to AMR, rapid diagnostics, surveillance, prevention, and prediction associated with antimicrobial resistance in oncology. Of interest are the ESKAPE pathogens (*Enterococcus faecium*, *Staphylococcus aureus*, *Klebsiella pneumoniae*, *Acinetobacter baumannii*, *Pseudomonas aeruginosa*, and *Enterobacter* spp.) and carbapenem-resistant Enterobacterales. Finally, we welcome papers that provide insights into ways to predict, prevent, and treat antibiotic-resistant infections that will positively impact the care and survival of cancer patients.
