Deadline for manuscript submissions:

31 January 2025

Message from the Guest Editor

Dear Colleagues,

The diagnosis of a mesenchymal malignancy or sarcoma requires an arsenal of medical tools, including X-rays, computed tomography (CT) scans, magnetic resonance imaging (MRI), and positron emission tomography (PET) scans. However, the diagnosis or confirmation of a sarcoma still requires the involvement of one or more pathologists.

Through a compilation of expert insights and cutting-edge research, this Special Issue aims to deepen understanding, discuss best practices, and shed light on the latest advancements in this tumor's diagnosis, treatment, and prognosis. It is an invaluable resource for clinicians, researchers, and patients, fostering a shared commitment to conquer this elusive disease.

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
