### Message from the Guest Editors

Dear Colleagues,

Forensic sciences are constantly evolving. It has been demonstrated time and again how the multidisciplinary approach leads to innovations in all areas with repercussions from a practical point of view.

This Special Issue aims to collect reviews, original articles, technical notes, and case reports that can put legal medicine at the center, without neglecting other disciplines (such as forensic radiology, anthropology, genetics, etc.).

Only in this way can forensic science make itself modern, innovative, and advanced.
