Message from the Guest Editor

The 2022 GARD Forum: Bridging Technologies and Market Needs, to be held on 25–26 February 2022, is a gathering of scientists and practitioners from around the globe to share the state of the art in the development of rapid diagnostics in support of sustainable health in all forms—human, animal, and ecosystem health. In addition, the forum serves as a marketplace where customers' needs are addressed with innovative technologies, especially to help those in low-resource populations. The event covers 30 hours of continuous programming in various time zones, with different continents holding technical sessions while allowing everyone across borders to join freely.
