submissions:

31 August 2024

Message from the Guest Editor

Dear Colleagues,

The specialty of chronic wound care, “woundology”, developed in the absence of diagnostics, yet the recent rise in diagnostic imaging techniques and biomarker detection promises to revolutionize the practice of wound care and point-of-care techniques that identify bacterial virulence factors are under study. In addition, fluorescence imaging can detect bacterial load at the bedside and devices that rapidly evaluate tissue oxygenation and perfusion will also play a role in evaluating chronic wounds. This Special Issue presents new research and reviews the evidence for diagnostics in the burgeoning field of wound healing.

Dr. Thomas E. Serena

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
