Advances in Gastrointestinal Endoscopy for Diagnosis and Treatment

Guest Editors:

Dr. Apostolis Papaefthymiou

1. Endoscopy Department, Cleveland Clinic London, London SW1X 7HY, UK
2. Gastroenterology Department, University Hospital of Larissa, 41334 Larissa, Greece

Dr. Paraskevas Gkolfakis

1. Department of Gastroenterology, Hepatopancreatology and Digestive Oncology, Erasme University Hospital, Université Libre de Bruxelles, 1070 Brussels, Belgium
2. Department of Gastroenterology, General Hospital of Nea Ionia "Konstantopoulou-Patision", Athens, Greece

Message from the Guest Editors

Gastrointestinal Endoscopy has evolved in recent years, providing game-changing advantages in diagnosis and treatment by incorporating new devices, techniques and technological advances. The quality improvement in endoscopic views and the introduction of adjuvant tools, such as digital chromoendoscopy, endo-microscopy and artificial intelligence, have optimized visual diagnosis and targeted sampling in the broad field of luminal and pancreatobiliary pathologies. Moreover, the spectrum of therapeutic endoscopy has increased with new innovations which provide the potential for minimally invasive endo-surgical interventions from the esophagus to the rectum, including bariatrics, full thickness resections and pancreatobiliary interventions, even in patients with altered anatomy. This Special Issue aims to summarize the current diagnostic and therapeutic abilities and present the emerging approaches in GI endoscopy.

Deadline for manuscript submissions:

closed (30 June 2024)

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical
Physiology, Nuclear Medicine &
PET National University Hospital,
Rigshospitalet, University of
Copenhagen, Blegdamsvej 9, DK-
2100 Copenhagen, Denmark

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
