submissions:

31 March 2025

Message from the Guest Editor

Diagnostics in the emergency department is focused on defining the first clinical framework of critical patients admitted to hospitals. In recent years, different tools have been introduced to accelerate diagnosis in emergency departments. This innovation is particularly crucial to help emergency physicians both in the rule-out/rule-in of patients attending the ED, and defining the appropriate clinical setting for patients requiring hospitalization, reducing the length of stay of patients at the ED and the consequent overcrowding. This Special Issue is dedicated to scientific contributions regarding different aspects of innovative diagnostic tools used in the emergency department. We welcome a wide range of contributions, including reviews, original research articles and case reports.

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
