### Message from the Guest Editors

Diagnostic methods for sepsis have been evolving and improving in recent years. Lately, multimodal diagnostic techniques that ultimately increase the safety of medical acts have been in the public eye. Thus, modern techniques for diagnosis and continuous monitoring of sepsis have recently been introduced in current clinical practice, especially in intensive care units. Another important aspect in the management of critically ill patients with sepsis and septic shock is the economic aspect, as these patients undergo prolonged stays in intensive care units, high consumption of antibiotics, prolonged mechanical ventilation, and require special extra-corporeal techniques.

This Special Issue will gather papers on the core topic of modern multimodal monitoring and diagnostic techniques in sepsis, with a focus on patient-oriented therapy based on the individual needs of each patient. Thus, we want to accumulate articles that address this clinical phenomenon multidisciplinary and gather information about diagnostic methods in sepsis, continuous monitoring methods, and implications on energy needs, antibiotic therapy, fluid therapy, not being limited to these examples.

## Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
