Deadline for manuscript  
submissions:

**closed (15 June 2024)**

### Message from the Guest Editor

Dear Colleagues,

Since digital data such as personal information, corporate business secrets, and important national facilities are stored and utilized in the institution's server or cloud server, they are protected and managed by a high-level information protection program. With the technological development of new technologies such as IoT and AI, interest in the increase and utilization of data has begun. In addition, new methods of acquiring data have been introduced. Data analysis is being studied for the valuable use of data, and it is being actively studied in academia, companies, and government. However, since sensitive digital data can be used as ransomware, research is also needed to solve this problem.

This Special Issue aims to advance the state of the art by gathering original research in the field of software-intensive systems, fundamental connections between the theory of information protection and extensive research on security issues for digital assets and various IT systems and devices. There is no limit to the broad content of various computer engineering topics outside the subject of this special feature.

## Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
