### Message from the Guest Editor

Dear Colleagues,

The main aim of this Special Issue is to capture recent contributions of high-quality papers focusing on advanced image processing and analysis applications, including medical images, remote sensing images, galaxy images, and others. We are pleased to invite our colleagues to contribute original research papers as well as review papers that focus on the applications of artificial intelligence methods, including traditional machine learning methods, advanced deep learning approaches, metaheuristic optimization algorithms, and other AI-based methods for solving image processing problems.

The topics of this Special Issue include (but are not limited to) the following:

- Image classification and recognition
- Machine learning for image processing
- Metaheuristic optimization algorithms for image processing
- Remote sensing image classification
- Medical image classification
- Neural computing for image processing
- Evolutionary algorithms for image processing

## Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
