

Recent Advanced Applications of Virtual Industrial Informatics and Robotics

Guest Editors:

Dr. Răzvan Gabriel Boboc

Dr. Radu Godina

Dr. Albert Smalcerz

Prof. Dr. Dimitris Mourtzis

Deadline for manuscript
submissions:
closed (28 February 2023)

Message from the Guest Editors

Dear Colleagues,

In the new industrial age, technologies such as Artificial Intelligence (AI), Virtual/Augmented Reality (VR/AR), Internet of Things (IoT), automation, robotics and much more have a significant role.

Industrial informatics, as a border field between informatics and manufacturing technologies, offers the possibility of developing complex systems for planning and controlling manufacturing systems. In addition, human-machine interaction and virtual technologies open up possibilities for improving industrial processes through collaboration between the human operator and automated systems or robots. Immersive technologies (e.g., VR) allow users to transcend into virtual environments, AR technologies facilitate the self-learning and training of human operators, while mobile robots are becoming more and more collaborative and able to work in teams with humans.

This Special Issue focuses on manufacturing technologies that include the use of modern methods, tools and technologies aimed at using informatics, VR technologies and robotic solutions to develop innovative applications that can bring more benefits of current industrial processes.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
