India

Deadline for manuscript  
submissions:

**closed (31 October 2018)**

### Message from the Guest Editors

Dear Colleagues,

Less budget, resource constraints, and continuous software upgrades are a few problems affecting the implementation of smart cities. The only solution to these problems is to develop smarter technology and a more efficient usage in order to meet the needs of smart cities. The aim of this Special Issue is to report on the design and development of smart sensors, a universal interfacing platform, along with the IoT framework, extending it to next generation networks (4G, 5G, and future networks) for monitoring parameters of interest with the goal of achieving smart cities. Examples of this work include developing novel sensors for monitoring environmental pollution and other parameters, and making the data available to a wider community through remote access cloud computing.

Dr. Subhas Chandra Mukhopadhyay

## Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Control and Systems Engineering*)
