## Deep Generative Modeling: Theory and Applications

Guest Editor:

### **Dr. Jakub Tomczak**

Department of Mathematics and  
Computer Science, Eindhoven  
University of Technology, 5612 AZ  
Eindhoven, The Netherlands

Deadline for manuscript  
submissions:

**closed (31 May 2024)**

### **Message from the Guest Editor**

The field of Generative Artificial Intelligence tackles the problem of formulating AI systems by combining probabilistic modeling and deep learning. More specifically, it aims for formulating deep generative models that could be used for defining generative processes, synthesizing new data, and quantifying uncertainty. This Special Issue is a forum for the presentation of new and improved deep generative models as well as their applications. In particular, theoretical considerations about deep generative modeling (e.g., an analysis with the help of statistical tools based on information theory), and real-life applications (e.g., in Life Sciences or Molecular Sciences) fall within the scope of this Special Issue.

## Editor-in-Chief

### Prof. Dr. Kevin H. Knuth

Department of Physics, University  
at Albany, 1400 Washington  
Avenue, Albany, NY 12222, USA

## Message from the Editor-in-Chief

The concept of entropy is traditionally a quantity in physics that has to do with temperature. However, it is now clear that entropy is deeply related to information theory and the process of inference. As such, entropic techniques have found broad application in the sciences.

*Entropy* is an online open access journal providing an advanced forum for the development and/or application of entropic and information-theoretic studies in a wide variety of applications. *Entropy* is inviting innovative and insightful contributions. Please consider *Entropy* as an exceptional home for your manuscript.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [PubMed](#), [PMC](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Physics, Multidisciplinary*) / CiteScore - Q1 (Mathematical Physics)
