Message from the Guest Editors

Dear Colleagues,

Aquaculture feeds usually account for between 50 and 70% of the total operational costs for fisheries, making them an important investment for many farms worldwide. In order to successfully grow aquatic species in a business setting, several factors must be considered; however, nutritionally balanced feed is at the forefront. Feed additives have been used to improve feed efficiency in aquaculture species, enhancing their growth performance and immune response, thereby reducing the need for antibiotics that may be considered harmful for the environment.

In this Special Issue, original research articles and reviews are welcome. We especially encourage the submission of manuscripts on feed additives used in aquaculture.

Dr. Amina Moss

Message from the Editor-in-Chief

Fishes is a multidisciplinary open access journal focusing on reports of original research and critical reviews and synthesis from the broad area of fishes and aquatic animals. The ultimate objective of *Fishes* is to facilitate the discovery of connections between research areas, advancing science and filling knowledge gaps, and providing solutions for all present and future issues encountered in the sector of fisheries and aquaculture. As Editor-in-Chief, I encourage you to consider *Fishes* for your scientific papers and would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubAg](#), [FSTA](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Marine and Freshwater Biology*)

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.2 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2024).
