

## Forest Management and Economics: Integrating Objectives Using Harvest Scheduling and Operations Research

Guest Editors:

**Prof. Howard M. Hoganson**

Department of Forest Resources  
& North Central Research and  
Outreach Center, University of  
Minnesota, 1861 Highway 169 NE,  
Grand Rapids, MN 55744, USA

**Prof. Dr. Ljusk Ola Eriksson**

Swedish University of Agricultural  
Sciences, Skogsmarksgränd,  
90183 Umea, Sweden

**Dr. Eric B. Henderson**

Regional Planning Analyst, USDA  
Forest Service Region, Missoula,  
MT, USA

Deadline for manuscript  
submissions:

**closed (20 March 2022)**

### Message from the Guest Editors

Spatial arrangement of the forest often impacts multiple objectives and complicates stand interdependencies. Tools from operations research can help planners to explore many possibilities to better understand trade-offs and consider management recourse opportunities in a changing world where the long-term nature of production makes potential mistakes a substantial concern.

With advances in remote sensing, the amount of information available to support forest planning continues to expand. It is important to continue to ask: How can we better manage the forest today while helping to ensure a desirable future? Operations-research-based decision support systems for forest management are now common throughout the world. Society is also realizing the potential gains from collaborative management across forest ownerships. This Special Issue will provide insight into potential ways that tools from operations research can help to improve forest management decisions and investments. Papers involving either new methods or unique, detailed practical applications are encouraged.

an Open Access Journal by MDPI

## Editors-in-Chief

### Prof. Dr. Cate Macinnis-Ng

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

### Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

## Message from the Editorial Board

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

**Journal Rank:** JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
