BIM for Cultural Heritage (HBIM)

Guest Editors:

Message from the Guest Editors

Prof. Dr. Pierre Grussenmeyer

Dear Colleagues,

Prof. Dr. Alex Yen

Dr. Jan Boehm

Dr. Luigi Barazzetti

The BIM process has mainly been focused on new buildings, covering the whole building life-cycle from the construction phase to asset management. The generation of accurate as-built parametric models of structures and infrastructures verified by point cloud surveys is a complex task of primary importance in reuse and renovation projects in the architecture, engineering, and construction industry. BIM for built heritage (HBIM) is still an emerging field. The biggest difference between BIM and HBIM is that HBIM faces a built heritage that has already existed for a period of time and has special value. Built heritage is characterized by complex morphology and nonhomogeneous features which clash with BIM's standardized procedures. HBIM research is linked to the value of architectural heritage.

Message from the Editor-in-Chief

The *ISPRS International Journal of Geo-Information* invites you to submit research articles, reviews, and reports covering topics of the whole domain of geo-information. Although the journal was only founded in 2012, it has already achieved wide recognition in the scientific community. We are proud that since April 2015, our journal is indexed by the SCIE of the Web of Science. As Editor-in-Chief, I encourage you to consider *IJGI* for your scientific papers and would be pleased to welcome you as authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), GeoRef, PubAg, dblp, Astrophysics Data System, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Remote Sensing*) / CiteScore - Q1 (Geography, Planning and Development)
