Advances in Wireless Communications Systems

Guest Editors:

Dr. Stefano Caputo

Department of Information Engineering, University of Florence, 50121 Firenze, FI, Italy

Dr. Lorenzo Biotti

Department of Information Engineering, University of Florence, 50121 Firenze FI, Italy

Dr. Lorenzo Mucchi

Department of Information Engineering, University of Firenze, Via S. Marta 3, 50139 Firenze, Italy

Deadline for manuscript submissions: closed (31 July 2023)

Message from the Guest Editors

In recent period, fifth generation (5G) of mobile communications helped to bridge the growth of data and device connections demand. This Special Issue of *Advances in Wireless Communications Systems* aims to investigate new challenges and opportunities, which will be enabled by sixth generation (6G) of mobile communications.

The next network protocols should take account of resources allocation and optimization, also provided by new artificial intelligence algorithms or Fog computing and networking systems. Moreover, massive data transmission should require a high level of cybersecurity, including physical layer security. Last but not least, to satisfy next network performance demand, new spectral bands in radio and optical frequencies are required.

Papers should highlight either theoretical issues or practical applications, such as smart city with ultra-low latency communications, healthcare with massive density of wireless body area networks (WBANs), Internet of Things with ultra-low power communications, infotainment with high throughput for ultra-high multimedia definition, etc.

Editor-in-Chief

Prof. Dr. Willy Susilo

School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions. **High Visibility:** indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases. **Journal Rank:** CiteScore - Q2 (*Information Systems*)
