Infrastructures

MDPI

Message from the Editor-in-Chief

You are invited to contribute a research article, review or short communication for consideration and publication in *Infrastructures* (ISSN 2412-3811). There is no restriction on the maximum length of the papers. *Infrastructures* is published in open access format. The scientific community and general public have unlimited free access to the content as soon as it is published. *Infrastructures* is supported by the authors by the payment of article processing charges for accepted manuscripts. Please consider Infrastructures as an exceptional opportunity to publish your work.

Aims

Infrastructures (ISSN 2412-3811) is an international scholarly journal covering all aspects of infrastructure engineering. The journal publishes regular research papers, critical reviews, and short communications. There is no restriction on the maximum length of the papers. We aim to encourage scientists to publish their experimental and theoretical research in as much detail as possible. Full experimental and/or methodological details must be provided for research articles.

Scope

- Construction technology, maintenance, retrofitting, and management of constructed facilities; life cycle assessment and updating; construction materials and utilities; management information systems; intelligent control systems; BIM;
- Analysis of transportation networks, logistics, supply chains, management of transport systems, intelligent transportation systems, safety, and mobility;
- Structural design, structural control, health monitoring and prediction, non-destructive technologies, inspection, structural reliability/stability;
- Pavement, railway, bridge, tunnel, dam, port and marine, geotechnical, environmental, water resources, and survey engineering;
- Computers in civil engineering, automation, and robotics in construction;
- Smart infrastructures; sustainable infrastructures; aging infrastructures; resilient infrastructures: adaptation to climate change, extreme events, hazards and mitigation;
- Artificial intelligence, cognitive modeling, concurrent engineering, distributed computing, evolutionary computing, fuzzy logic, genetic algorithms, geometric modeling, internet-based technologies, machine learning algorithms, mobile computing, multimedia technologies, neural network computing, parallel processing, software engineering, VR/AR/MR, and visualization techniques.

Author Benefits

Open Access
Unlimited and free access for readers

No Copyright Constraints
Retain copyright of your work and free use of your article

Thorough Peer-Review

Discounts on Article Processing Charges (APC)
If you belong to an institute that participates with the MDPI Institutional Open Access Program

No Space Constraints, No Extra Space or Color Charges
No restriction on the maximum length of the papers, number of figures or colors

Journal Rank
CiteScore - Q2 (*Building and Construction*)

Coverage by Leading Indexing Services
Scopus, ESCI (Web of Science), Inspec, and other databases

Rapid Publication
A first decision is provided to authors approximately 16.9 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the second half of 2023)
