Message from the Guest Editors

Psoriasis is a chronic inflammatory disease that affects about 2-4% of the global population. At present, more than 10 different biologics drugs and 2 small molecules are available for psoriasis treatment. In this context, the dermatologist should choose the right treatment for the right patient at the right time while analyzing numerous different factors, such as comorbidities, the patient's preferences, drugs peculiarities, etc.

In this Special Issue, we invite the authors to present articles on modern approaches to psoriasis, with specific attention paid to real-life treatments as well as future possibilities.

- psoriasis
- psoriatic arthritis
- biologics
- small molecules
- comorbidities

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
