### Message from the Guest Editors

The Editors of this special Issue are pleased to invite the authors to submit their original research articles related to complex analysis and its applications which provide not only new results or methods but also may have a great impact on other areas of research. In particular, the preference will be given to high quality and well written papers in the fields of analytic and harmonic univalent functions, differential subordination and supersubordination, use of fractional and quantum calculus in complex analysis, quasi-conformal mappings, entire and meromorphic functions.

Deadline for manuscript  
submissions:

**closed (31 December 2021)**

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

**Journal Rank:** JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)
