Deadline for manuscript submissions:

31 December 2024

Message from the Guest Editor

Dear Colleagues,

The aim of this Special Issue is to highlight work on the synthesis of natural or non-natural molecules with specific therapeutic, agrochemical or cosmetic activities. It is important to list the latest advances in terms of synthetic routes or scaling-up processes to obtain bioactive molecules known for various activities or of potential interest following *in vitro* tests. Any research reporting improvements in pathways that may involve milder conditions than those used previously, atom economy, and faster syntheses is of interest for this Special Issue.

Work reporting improvements in the hemi-synthesis of natural molecules or relevant pharmacomodulations of natural or non-natural molecules is also welcome. All types of molecules of biological interest are covered by this Special Issue, whether they are heterocycles, glycosides or nucleosides.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
