Message from the Guest Editor

Dear Colleagues,

The Special Issue is devoted to novel antiviral agent research. We look forward to receiving articles on the following topics:

1. Drug design and molecular modeling in silico;
2. Antiviral activity of small molecules and protein or nucleic preparations in vitro;
3. In vivo research of antivirals using animal models;
4. Results of clinical and preclinical trials;
5. Research showing a drug's mechanism of action.

Paper selection will be carried out during the peer review process. Submitted papers must not be under consideration by another journal or publication.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.
