Message from the Guest Editors

Dear Colleagues,

Metal complexes are widely used as intermediates and/or catalysts in a huge area of applications, from industry to the "lab", with a continuous growing interest in their wide use in always new branches.

Molecules is pleased to announce a Special Issue focused on the "Chemical Kinetics in Metal Complexes". The Issue will cover both experimental and theoretical contributions concerning the properties of metal complexes as catalysts and/or reaction intermediates, from inorganic to bioinorganic.

It is a pleasure to invite you to submit manuscript to this Special Issue. Regular articles, communications, as well as reviews are all welcome.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.
