

Food Polysaccharides: Structure, Properties and Application II

Guest Editors:

Prof. Dr. Lesław Juszcak

Department of Food Analysis and
Evaluation of Food Quality,
University of Agriculture in
Krakow, Balicka 122 Str., 30-149
Kraków, Poland

Prof. Dr. Janusz Kapusniak

Department of Dietetics and
Food Studies, Faculty of Science
& Technology, Jan Dlugosz
University in Czestochowa, Armii
Krajowej 13/15, 42-200
Czestochowa, Poland

Deadline for manuscript
submissions:

30 September 2024

Message from the Guest Editors

Polysaccharides are an important group of natural polymers used in living organisms as a building and reserve material. This group is characterized by great diversity in terms of structure, place of occurrence and properties. Due to their complex nature and the resulting diversified physicochemical properties, polysaccharides play an important role in food production.

The purpose of this Special Issue is to identify and review the latest research findings on polysaccharides present in food and used in the food and related industries. We cordially invite you to contribute to this Special Issue in the form of both review articles and original research results. They can cover all aspects related to food polysaccharides, including structure, properties, analysis, modifications, practical applications and impacts on human health.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
