Deadline for manuscript  
submissions:

**31 July 2024**

### Message from the Guest Editor

Dear Colleagues,

The year 2023 is particularly remarkable because we are celebrating the 25th anniversary of the 12 principles of green chemistry described in the groundbreaking book, "Green Chemistry: Theory and Practice", co-authored by Paul Anastas and John C. Warner, and published in 1998.

The use of renewable resources is one of the most important of these principles. This approach is, in particular, very important for polymers, which have varied industrial applications. Thus, the use of biopolymers and biobased polymers could help the chemical industry to solve some of the current sustainability challenges of our society while also helping to obtain new materials with new properties.

This Special Issue on "Natural Polymers and Biopolymers IV" is motivated by the increasing attention that the field of "green polymers" is receiving. It will present cutting-edge research on the use of bioresources for polymer materials and will show how natural polymers and biobased synthetic polymers, with their interesting and original properties, are intended to replace and outperform some oil-based polymers.

Dr. Sylvain Caillol

## Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
