

Molecular Simulations Applications in Biochemistry and Molecular Biology

Guest Editors:

Prof. Dr. Angelo Facchiano

National Research Council,
Institute of Food Science, Via
Roma 64, 83110 Avellino, Italy

Dr. Anna Marabotti

Department of Chemistry and
Biology "A. Zambelli", Università
di Salerno, Salerno, Italy

Message from the Guest Editors

This Special Issue will include research articles that describe the development of novel molecular simulation approaches and the applications of current methods to unexplained aspects of biochemical mechanisms, with the opportunity to present purely computational studies, as well as computational studies with experimental validations. The Special Issue will include also articles from the 15th edition of the Bioinformatics and Computational Biology Conference (www.bbcc-meetings.it), Naples, Italy, November 16–18th, 2020.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
