Message from the Guest Editor

Dear Colleagues,

The past fifteen years have seen a booming number of articles and reviews describing the use of bio-resources as a starting point for original polymer chemistry. Hence, these latest developments have not only created a library of polymeric materials exhibiting a wide range of properties to fulfill the requirements of various industrial applications, but they have also improved our knowledge and understanding of the structure and reactivity of the complex biomass.

This Special Issue on “Natural Polymers and Biopolymers II” will present cutting-edge research works focusing on the use of bio-resources for polymeric materials. It will demonstrate that the field of “green polymers” is still gaining increased attention, highlighting that natural and biopolymers, with their interesting and original properties, are destined to replace their oil-based competitors.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
