College of Chemistry, Jilin  
University, Changchun 130012,  
China

### Dr. Yin Wang

Inner Mongolia Key Laboratory of  
Carbon Nanomaterials, Nano  
Innovation Institute (NII), College  
of Chemistry and Materials  
Science, Inner Mongolia  
University for Nationalities,  
Tongliao 028000, China

Deadline for manuscript  
submissions:

**closed (31 January 2022)**

### Message from the Guest Editors

Oxygen/hydrogen-involved reactions are at the core of many energy storage and conversion technologies—for example, water electrolysis, ammonia synthesis, carbon dioxide reduction, fuel cells, metal–air batteries, and hydrogen peroxide synthesis. However, the low efficiency and poor durability of oxygen/hydrogen-involved electrode materials have greatly limited their application and development. Therefore, the design and synthesis of high-performance electrocatalysts for these reactions are urgent. This Special Issue is devoted to reporting novel electrocatalysts or electrochemical systems for oxygen/hydrogen-involved reactions. We invite researchers to contribute original articles and reviews, which include, but are not limited to, the following topics:

- electrochemical water splitting;
- electrocatalyst for oxygen evolution reaction of hydrogen evolution reaction;
- 4e<sup>-</sup> or 2e<sup>-</sup> oxygen reduction evolution for H<sub>2</sub>O or H<sub>2</sub>O<sub>2</sub>;
- electrocatalytic N<sub>2</sub> reduction to ammonia;
- electrocatalytic CO<sub>2</sub> reduction reaction;
- metal-air battery.

Münster, Germany

## Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
