Potential Anti-SARS-CoV-2 Molecular Strategies

Guest Editors:

Dr. Giovanni N. Roviello

Institute of Biostructures and
Bioimaging, Italian National
Council for Research (IBB-CNR),
Via P. Castellino 111, 80131
Naples, Italy

Dr. Caterina Vicidomini

Istituto di Biostrutture e
Bioimmagini IBB-CNR, Via
Tommaso De Amicis 95, 80145
Naples, Italy

Deadline for manuscript
submissions:

closed (31 December 2022)

Message from the Guest Editors

In this Special Issue, we wish to focus on the area of novel anti-coronavirus drug discovery, design, and development, with the main interest, obviously, on the most pathogenic CoVs and in particular SARS-CoV-2 and MERS-CoV. However, contributions on other CoVs are also welcome as they could improve overall knowledge on the Coronaviridae. Other themes of interest are inherent in the development of vaccines against CoVs, and the investigation of the biomolecular processes targetable by anti-CoV strategies.

The issue is open to the submission of both original articles and reviews that describe research and ideas on themes around anti-CoV molecular strategies.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical
Biology and Phytochemistry,
University of Münster,
Corrensstrasse 48, D-48149
Münster, Germany

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
