Message from the Guest Editors

It is our pleasure to present this Special Issue of *Molecules*, entitled “Phytochemicals from Fruit and Vegetable Byproducts and Wastes and Their Re-use”. The aim of this Special Issue is to collect original research articles and reviews on this topic, ranging from method development and optimization to the investigation and exploitation of functional properties of those bioactive compounds extracted from fruit and vegetable industry byproducts and wastes.

You are welcome to visit the [website](#), submit the **abstract** and **full paper**. If you have any questions, please feel free to contact the managing editor Larry Li (larry.li@mdpi.com). We look forward to receiving your contribution!

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.
