### Message from the Guest Editor

Dear Colleagues,

Surfactant science has attracted the attention of researchers from all over the world because of the large extent of surfactants' application fields (petroleum oil recovery, corrosion inhibitors, drugs, detergents, demulsifiers, etc.), in addition to the more important auxiliary role for surfactants in nanotechnology and catalysis science.

In this Special Issue dedicated to "Synthesis, Characterization and Application of Surfactants" publishes scientific contributions in the surfactants area. This comprises the applied science of oleochemical and petrochemical surfactants, as well as the performance and development of surfactants in all applications. Experimental and computational investigations are welcome.

## Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.
