Observation and Impact Evaluation of Atmospheric Pollution by Remote Sensing

Guest Editors:

Dr. Xin Yang
College of Global Change and Earth System Science, Beijing Normal University, Beijing, 100875, China

Prof. Dr. Kai Qin
School of Environment and Spatial Informatics, China University of Mining and Technology, Xuzhou 221116, China

Prof. Dr. Simone Lolli
CNR-IMAA, Contrada S. Loja, 85050 Tito Scalo, PZ, Italy

Deadline for manuscript submissions:
closed (30 April 2023)

Message from the Guest Editors

This Special Issue entitled "Observation and Impact Evaluation of Atmospheric Pollution by Remote Sensing" will collect and integrate current accomplishments and future advancements of advanced remote sensing of air pollution. Community members are sincerely invited to submit contributions related to elements of air pollution in providing a comprehensive request for impact assessments on public health and climate changes. Both comprehensive reviews and research articles on atmospheric pollution monitoring are welcomed. The topics of this issue consist of (but are not limited to):

- PM 2.5 concentration estimation and prediction;
- aerosol–radiation–cloud–precipitation interaction;
- Optical properties modeling of air pollutants;
- Advanced deep learning approaches for air pollution monitoring.

Special Issue

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.
Journal Rank: JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
