

Intelligent Underwater Systems for Ocean Monitoring

Guest Editors:

Dr. Yan Pailhas

Prof. Dr. Francesco Maurelli

Dr. Danilo Orlando

Dr. Chengpeng Hao

Deadline for manuscript
submissions:

closed (1 February 2022)

Message from the Guest Editors

This Special Issue calls for papers on intelligent underwater systems ranging from the Autonomous Underwater Vehicle design and autonomy to the development and the exploitation of underwater sensors as well as data. Contributions can also include new concepts for greater autonomy of system platforms, as, for instance, single and multi platform architectures and also smarter ways to gather and process data provided by a single sensor as well as sensor networks.

- ocean remote sensing
- ocean acoustics
- signal processing
- underwater acoustics
- image processing

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank: JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
