Emerging Sensor Technology in Agriculture

Guest Editors:

Prof. Dr. Sigfredo Fuentes

Digital Agriculture Food and Wine, School of Agriculture and Food, Faculty of Veterinary and Agricultural Science, The University of Melbourne, Parkville, VIC 3010, Australia

Dr. Carlos Poblete-Echeverria

Department of Viticulture and Oenology, Faculty of AgriScicences, Stellenbosch University, Stellenbosch, South Africa

Deadline for manuscript submissions:

closed (31 December 2019)

Message from the Guest Editors

Dear Colleagues,

Challenges imposed by climate change have caused significant interest and investments, from different countries, into research areas related to smart digital agriculture. This has been notably triggered by an impending population increase to 9.2 billion in 2050, and the requirement of producing 70% more food by 2050 in half of arable land available today (FAO).

In order to be successful in overcoming the effects of climate change, and to remain competitive and sustainable as a country in the agricultural sector, there is a need to acknowledge these challenges and support research and applications in the development of new and emerging sensor technologies and their applications in agriculture. The development of new and emerging technologies applied to sensor networks will help to overcome these issues by basing decision making on more accurate, meaningful data with high spatial and temporal resolutions. [...]

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases. **Journal Rank:** JCR - Q2 (*Chemistry, Analytical*) / CiteScore - Q1 (Instrumentation)
