Separation and Analysis of Micro- and Nanoplastics in the Environment

Guest Editors:

Dr. Šime Ukić
Faculty of Chemical Engineering and Technology, University of Zagreb, Marulićev trg 19, 10000 Zagreb, Croatia

Dr. Dajana Kučić Grgić
Faculty of Chemical Engineering and Technology, University of Zagreb, Marulićev trg 19, 10000 Zagreb, Croatia

Deadline for manuscript submissions:
closed (10 February 2024)

Message from the Guest Editors

The global production of plastics over the past 50 years has been about 9.1 billion tons, with an annual growth rate of about 8.7%. The use of plastics has brought enormous societal benefits, but also generates large amounts of plastic waste that often ends up in the environment, and research conducted in recent decades has shown various negative effects that have raised global concern about the impact of plastics on the environment. The problem of tiny plastic particles, known as microplastics and nanoplastics, has attracted particular attention in recent years because they are more easily ingested than larger particles. Nowadays, many countries around the world recognize microplastics and nanoplastics as emerging pollutants, which accordingly, receive more attention. Therefore, it is important to monitor the concentration of these particles in the environment and develop simple, efficient, and cost-effective methods to remove them from the environment. Editor-in-Chief

Prof. Dr. Frank L. Dorman
Department of Chemistry, Dartmouth College, Hanover, NH 03755, USA

Message from the Editor-in-Chief

Separations offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Chromatography*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, and other databases.
Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.4 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2024).
