Water Scarcity: From Ancient to Modern Times and the Future, Volume II

Guest Editors:

Dr. Vasileios Tzanakakis

Department of Agriculture,
School of Agricultural Sciences,
Hellenic Mediterranean
University, 71410 Heraklion,
Greece

Prof. Dr. Giovanni De Feo

Department of Industrial
Engineering (DIIN), University of
Salerno, 84084 Fisciano, SA, Italy

Dr. Andreas Angelakis

HAO-Demeter, Agricultural
Research Institution of Crete,
71300 Iraklion and Union of
Hellenic Water Supply and
Sewerage Operators, 41222
Larissa, Greece

Deadline for manuscript
submissions:

closed (20 June 2024)

Message from the Guest Editors

This Special Issue of *Water* entitled “Water Scarcity: From Ancient to Modern Times and the Future” aims to address all the above aspects by seeking relevant research and review manuscripts. More analytically, the scope of this SI could include:

- The collapse of old civilizations: The role of drought;
- Urbanization and water supply;
- The history of water science and technology;
- Climate change variability and water quality and supply;
- Water supply under water scarcity;
- Irrigation and drainage under water scarcity;
- Water use efficiency issues;
- Water scarcity and land use: environmental and climate impacts;
- Water scarcity, food production, and economy impacts;
- Water scarcity and energy;
- Water scarcity and soil and water resources management;
- Water reuse;
- [...]

Editor-in-Chief

Dr. Jean-Luc PROBST

Laboratory of Functional Ecology and Environment, Centre National de la Recherche Scientifique (CNRS), University of Toulouse, Campus ENSAT, Auzeville Tolosane, France

Message from the Editor-in-Chief

In the context of global changes, the sustainable management of water cycles, going from global and regional water cycles to urban, industrial and agricultural water cycles, plays a very important role on the water resources and on their relationships with food, energy, biodiversity, ecosystem functioning and human health. *Water* invites authors to provide innovative original full articles, critical reviews and timely short communications and to propose special issues devoted to new technological and scientific domains and to interdisciplinary approaches of the water cycles. We ensure a critical review process and a quick turnaround between submission and final decision.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, GeoRef, PubAg, AGRIS, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Water Resources*) / CiteScore - Q1 (Water Science and Technology)
